Description Item # 07120369000P Model # 13B226JD299

The Craftsman Rear Engine Riding Mower Combines Visibility, Agility and Affordability

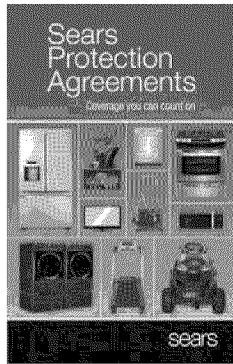

Not everything has to be big and brawny to get the job done, which holds true for **Craftsman's 6-speed small yard rider**. The rear engine mower offers easy mounting along with great visibility of the yard in front of you for faster, more precise cutting. The 420cc Craftsman engine propels the 335 pound riding mower at speeds up to 5 mph, and it's connected to a 6-speed shift-on-the-go manual transmission, putting you in control of having the right gear for the right situation.

The drive train combined with the 30 inch wide steel cutting deck on the **Craftsman rear engine riding mower** makes winding around gardens, fences, trees and other obstacles easy, reducing the need to stop and reverse for a quicker mow. Tailor your lawn's look with five positions on the manually adjusting deck for cutting heights of 1.5 to 4 inches. The 13 inch soft grip steering wheel has a telescoping adjustment for your perfect height as you sit atop the 11 inch mid back seat with knob adjustment. The 14 gauge welded steel frame and front axle offer reassurance, reliability and durability to help get your work done.

- An 18 in. turning radius on the **Craftsman 6-speed small yard rider** provides maneuverability and stability
- Engine features full pressure lubrication and spin-on oil filter to promote longer life
- Manageable 30 in. wide, single blade cutting deck offers great cutting performance along with the ability to fit through smaller spaces like gates and store more easily
- Turf Saver Tires help prevent skidding so your grass isn't damaged while turning
- A deck wash system cleans out grass and other debris from the cutting deck by simply connecting a garden hose and turning the water on
- Riding mower is designed for light hauling to pull attachments like the two bin bagger part #24069 (sold separately)
- The deck and blade is mulching capable with mulch kit part #33525 (sold separately)
- Engine is CARB compliant for use in the State of California
